PROJECTS

AssembleScript | (Programming Language)
- Developed an interpreter for our own developed coding language in order to learn how the compiler, parser, or AST works.
- Tech-Stack: **Typescript, Deno.js., React.js, R3F.**
- Learnings: **Tokenization, Generating Abstract syntax tree, Parsing,**
- Project Link: **https://assemble-script.vercel.app/**

Trinity-2023 | (Event Website)
- Developed an event website with interactive components and a 3D model for ACM RSCOES's event trinity-2023.
- Tech-Stack: **Three.js, Blender, Figma.**
- Project Link: **https://trinity-2023.vercel.app/**

Innovision | (Event Website)
- Developed an event website with interactive and cool looking 3d background for our college's annual event innovision-2023.
- Tech-Stack: **Three.js, WebGL, GLSL, Figma.**
- Project Link: **https://www.innovision2023.com/**

AttainMate | (Full Stack Web Application)
- Developed a web-based application that finds all of the results for student course attainment. The app perform EXCEL automation.
- Tech-Stack: **React.js, Node.js, MongoDB, Express.js, Sheet.js, Figma.**
- Project Link: **https://github.com/Triple-Bond-SNS/AttainMate**

OPEN-SOURCE

TheAlgorithms/C
- **Circular Doubly Linked list**: Learned about **self-test implementations, Guard Clause**, etc.
- **Dynamic Stack:** Contributed the **implementation code** in an Open Source resource repository.
